PROFILE

I'm a full-stack developer at Comprend and a licensed dental hygienist by background. Today I build web platforms and integrations for clients like Swedbank, L'Oréal and SCA, mostly in TypeScript, React, C#/.NET and Optimizely. My years in dental care gave me something that's hard to learn from a book: I know how a clinic actually runs, how patient record systems are used day to day, and why patient data has to be handled with care. I like to understand the problem before I start building, and I don't let go of a solution until it works in production.

WORK EXPERIENCE

Comprend, Stockholm *April 2026 – present*

Junior Full-stack Developer

- Develop and maintain web platforms for Swedbank, L'Oréal and SCA in agile teams, working closely with UX, project managers and the client.
- Currently building an integration between Optimizely CMP and Elevate for a global management consultancy. It's a Python service that receives webhooks from CMP and creates posts through Elevate's REST API, with a separate step for images. It runs on Azure with Key Vault and APIM, uses PostgreSQL, and is tested with pytest, Postman and ngrok. I document how the API behaves and take requirement questions directly with the client's team.
- Built an automation system for L'Oréal Nordics' copy production in five languages (Swedish, English, Finnish, Danish, Norwegian). Copy is synced from Google Sheets to text layers in After Effects (ExtendScript and Apps Script) and translated with AI in n8n through seven workflows, one per brand, with character limits per channel such as Meta, TikTok and YouTube.
- Reworked the translation logic so that legally approved beauty and pharma claims are injected into the AI prompt before translation instead of being corrected afterwards. Also fixed encoding and performance issues in production, replaced unsafe eval() with JSON parsing, and made the scripts work on both Windows and Mac.
- Contribute to Swedbank's new site search, which is being rebuilt on GraphQL (Optimizely Graph).
- Develop SCA's website in Optimizely CMS (C#), including new page-type properties with conditional rendering, and illustrations and descriptions in Swedish and English in the block picker so new editors can find the right block faster.
- Build AI agents and custom tools in Optimizely Agent Platform (Opal) connected to the client's content workflows.
- Work from tickets with clear acceptance criteria and code review, and use AI tools every day in my work.

Comprend, Stockholm *November 2025 – April 2026*

Software Developer, internship

- Internship in the same team, working on real client deliveries. Hired directly after the internship.

DentSmile, Sundsvall *2024 – 2026*

Dental Hygienist

Tandläkargruppen Täby Centrum *2018 – 2024*

Dental Hygienist

- Own patient responsibility, treatment planning and daily record keeping under the Swedish Patient Data Act and GDPR.

Folktandvården Mörby Centrum *2016 – 2018*
Dental Hygienist / Dental Assistant

Coop Vallentuna Centrum *2014 – 2019*
Store Associate

TECHNICAL SKILLS

- **Frontend:** TypeScript, JavaScript, React, Next.js, HTML, CSS, Tailwind, component libraries
- **Backend:** C#, .NET / ASP.NET Core, Entity Framework Core, Python, REST and GraphQL APIs, webhooks, integrations with external APIs
- **Databases:** PostgreSQL, SQL Server, SQL
- **CMS, cloud & automation:** Optimizely (CMS, Graph, CMP, Agent Platform), headless architecture, Azure (Key Vault, APIM), n8n
- **Quality & ways of working:** Git/GitHub, automated testing, CI/CD (GitHub Actions), code review, agile teams, AI-assisted development
- **Domain:** Dental care, patient record systems, patient data, GDPR in practice

CERTIFICATIONS

- **Optimizely Certified Opal Administrator** – May 2026
- **Optimizely Opal Development Accredited** – December 2025
- **Optimizely Certified Opal Tools Developer** – November 2025

EDUCATION

Nackademin, Solna *2024 – 2026*
.NET Software Development, Higher Vocational Education diploma (May 2026)

Karolinska Institutet *2015 – 2018*
Bachelor's degree in Oral Health, Dental Hygiene programme

Åva gymnasium, Täby *2012 – 2015*
Natural Science programme

PERSONAL PROJECTS

- **Real-time chat app:** TypeScript/React frontend and C#/.NET backend. github.com/MayAdnan
- **CineMatch:** web app in C#/ASP.NET Core with React, SQL Server and a REST API.
- **CarSim DevOps:** CI/CD pipeline with automated tests in GitHub Actions.

LANGUAGES

Swedish – native · Arabic – native · English – fluent · Spanish – good working knowledge
